Self Analysis

1. What was the hardest part of the assignment for you?

The whole assignment, especially the extra credit was hard. Lack of TA help for this assignment due to coronavirus lock down.

2. What was the easiest part of the assignment for you?

Question 8 by a mile

3. What problem(s) helped further your understanding of the course material?

All The problems helped further my understanding except the ones in the analysis.py file. The extra credit helped tons, sense you did not cover in class

4. Did you feel any problems were tedious and not helpful to your understanding of the material?

The questions in the analysis.py file. I felt like I was playing with numbers.

5. What other feedback do you have about this homework

Most improvements revolve around the coronavirus shut down. Not really applies to the overall assignment
